

My 72 hours

By Katrina Smith (a very grateful client)

April 2018

A diary of my frizz free adventure 😊

Day one (Tues)

Application appointment took just over two hours. As always it's a pleasure to spend time at Style being pampered and with great company (thanks Danni).

Hair felt a bit stiff to the touch but otherwise great and didn't look as if it had tons of hair

By evening I was conscious of the product's distinctive

Thank you so much for inviting me to be your tester!

product on it. Hair felt much more "free" moving than with the Nanokeratin which feels quite "heavy" on your head.

smell. Not unpleasant but noticeable. Brushed hair to keep it straight and feeling less stiff.

Pros

•••

Could definitely cope with going to work on the day after application; perhaps even day two. Day three might require a paper bag!

Main difference was that it felt fairly normal (if you didn't touch it) and wasn't heavy, or excessively greasy looking. There was also no itchiness.

Cons

•••

I'm struggling to think of anything. My eyes stung a little during the application (straightening stage) but cleared up within minutes

Overall

•••

As long as the results last as long I would definitely choose this product again.

Day Two (Weds)

Just brushed and straightened and not looking greasy at all.

Still a bit sticky to touch with fingers but feels normal otherwise.

I wasn't aware of the product at all during the day other than remembering to avoid the rain!

Day three (Thurs)

OK, so now it's starting to look and feel a bit manky! However it's not driving me too crazy because it doesn't feel heavy on my head and isn't itchy.

Getting me down only because it's a nice sunny day and I can't tie it up.

Roll on tomorrow when the 72 hours will be up!

Wash Day (Fri)

Sadly no pics taken but I am very happy with the results. **Soft, shiny and very frizz free.**

The days following....

It's such a treat to simply get out of bed, brush & go!

My work colleagues all commented on how shiny it looks.

Previously Nanokeratin has sometimes left my hair too straight in the first few weeks. This time I still have lots of volume.

This is after the first wash by me; still lots of volume.

And finally....)

A little reminder of how it could look when I'd just dried it myself...admittedly I didn't use a brush here!
